

NUTAN

in nutan-shah-gupta ✉ guptanutan2002@gmail.com ☎ 7305989668

Professional Summary

Motivated detail-oriented computer science and engineering student with a strong foundation in programming and web development. Proficient in Python for multifunctional problem solving and proficient in HTML, CSS and JavaScript to build dynamic and functional web applications. Demonstrates an interest in learning new technologies and applying them to develop effective, easy-to-use solutions. Expert in colleague teamwork and independent projects, committed to delivering high quality.

Education

- **SRM Institute Of Science And Technology, Kattankulathur** 2021-2025
Computer Science And Engineering (Software Engineering)
CGPA: 7.32
- **12th Grade, CBSE** 2021
Bhagat Singh School, Kota, Rajasthan
Percentage: 75%
- **10th Grade, CBSE** 2019
RPS School, Dharuhera, Haryana
Percentage: 82.6%

Projects

- **Comparative of Perceptual Hashing and Deep Learning Methods for Near-Duplicate Image Detection**
Analyzed the performance of perceptual hashing algorithms and deep learning techniques for identifying near-duplicate images. Evaluated robustness against transformations such as resizing, cropping, and color changes. Demonstrated that deep learning models achieve higher accuracy while perceptual hashing provides faster computation. Highlighted trade-offs between efficiency and precision for large-scale image datasets.
- **MarineDetect: A CNN-Based Solution for Ship Identification in Diverse Ocean Settings**
Developed MarineDetect, a CNN-based deep learning model for accurate ship identification in diverse ocean environments. Utilized computer vision techniques to analyze satellite and aerial images, improving detection accuracy under varying weather and lighting conditions. Optimized the model for real-time performance, enhancing maritime surveillance and security applications.
- **Faucet Plants Process Benchmarking Bhiwadi – Suzhou**
Comparing faucet manufacturing processes between Bhiwadi (India) and Suzhou (China). Analyzed productivity KPIs, manufacturing workflows, and process efficiencies to identify areas for improvement. Suggested automation, workflow optimization, and cost reduction strategies to enhance productivity at the Bhiwadi plant.

Achievements

- Reached Pre-Final Round in TechQ Quiz
- Summer Vocational Training at Roca Parryware Bathroom Products Pvt.Ltd. June - July 2023

Technologies

- **Technical Skills:** C++, Python, HTML, CSS, JavaScript, MySQL
- **Soft Skills:** Problem-Solving, Quick Learning, Teamwork

Certificates and Workshops

- Basic Python Programming
- ChatGPT and AI Tools Workshops
- 4th International Conference on Intelligent Systems and Sustainable Computing (ICISSC-2024)
- Six Days Offline Workshop on Emerging Trends in IoT

Personal Details

- **Language :** Hindi , English
- **Interests :** Badminton , Skating , Basketball .
